

We have a limited number of panels that have minor imperfections. These do not affect the reflective quality of the mirror and are largely unnoticeable. For this reason we can offer these at a reduced price. Photos available on request, but please be aware that it is extremely difficult to photograph the mirrors.

What is Mylar? – Most simply, it is a polyester membrane that is stretched and heat shrunk over a lightweight aluminium frame creating a lightweight and easily moved, hung or flown mirror.

Wall Mounted		Rollaway	Cloth Covers
			In response to numerous requests we have accessorized Rollaway studio mirrors, with a soft cover option to protect them when you are not around. Cloth Cover MC1518 \$145
